

## Ideation Phase Brainstorm & Idea Prioritization Template

Date	10 October 2022
Team ID	PNT2022TMID13653
Project Name	Signs with Smart Connectivity for Better Road Safety
Maximum Marks	4 Marks

### Brainstorm & Idea Prioritization Template:

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

### Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⌚ 10 minutes to prepare  
🕒 1 hour to collaborate  
👥 2-8 people recommended

**Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

---

**A Team gathering**  
All the team members are invited to participate in this session so as to gather more knowledge about our project.

**B Set the goal**  
There are much more road accidents happened in the last year because of uncontrolled speed and road conditions.

**C Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

[Open article](#) →

**1 Define your problem statement**

The road conditions on our city might be lead to accident and there is some physical sign boards to intimate the speed limit.

⌚ 5 minutes

---

PROBLEM

How might we replace physical sign boards with digital sign boards and help the drivers to avoid accidents due to road conditions?

↓

Key rules of brainstorming

To run an smooth and productive session

🗣️ Stay in topic.

🕒 Defer judgment.

🗣️ Go for volume.

💡 Encourage wild ideas.

👂 Listen to others.

👁️ If possible, be visual.

**Need some inspiration?**

## Step-2: Brainstorm, Idea Listing and Grouping

2

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

**TIP**  
You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Person 1	Person 2	Person 3	Person 4
LED displays can be used to change signal dynamically.	Accidents can be prevented by monitoring the road condition.	Roads can be made to communicate with the vehicles using some sensors.	IoT device can be used for those sensor communication.
Person 5	Person 6	Person 7	Person 8
It will be easy for the driver when there is dynamic digital signs.	Digital signs can be directly passed to the cars itself.	Humidity sensor and temperature sensor can be used to detect the wetness in the roads.	Pits and holes, bari gades can also be intimated to the car.

3

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Replace the physical static sign board into digital one.

Sending the road condition to the car

Information about the bari gades . Pits and holes and speed breakers will also be sent to the driver.

Sense the wetness of the road using Temperature and humidity sensors.

If possible add the voice implementation also.

## Step-3: Idea Prioritization

4

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes
